PRIMARY 6

PAPER 1
(BOOKLET A)

Name: _____( )

Parent's Signature

Class: Primary 6_____

_____

Marks:

Paper 1	Booklet A	20
	Booklet B	25
Paper 2		55
Total		100

Total Time for Booklets A and B: 1 hour

Do not turn over this page until you are told to do so.
Follow all instructions carefully.
Answer all questions.
Shade your answers in the Optical Answer Sheet (OAS) provided.
You are **not** allowed to use a calculator.

Downloaded from SingaKids.com

Downloaded from SingaKids.com

Questions **1** to **10** carry 1 mark each. Questions **11** to **15** carry 2 marks each.
For each question, four options are given. One of them is the correct answer.
Make your choice (1, 2, 3 or 4) and shade your answer in the Optical Answer Sheet.

(20 marks)

---

1 Which digit in 15.89 is in the tenths place?

(1) 1

(2) 5

(3) 8

(4) 9

2 There were 585 640 visitors to a museum last year. Round this number to the nearest thousand.

(1) 585 000

(2) 586 000

(3) 590 000

(4) 600 000

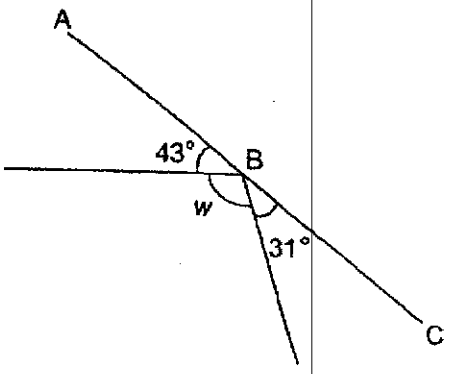

3 In the figure, ABC is a straight line. Find $\angle w$.

(1) 74°

(2) 90°

(3) 106°

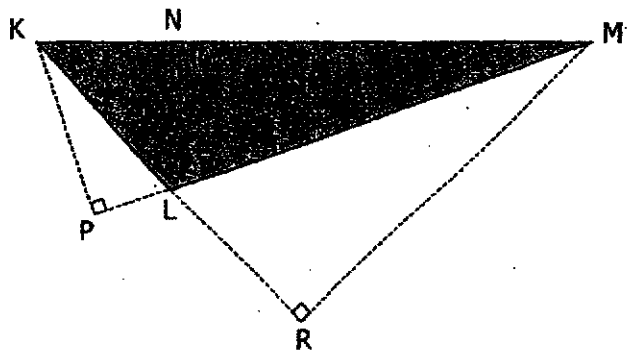

(4) 286°

(Go on to the next page)

Downloaded from SingaKids.com

4 The figure below shows triangle KLM. Given that LM is the base, which of the following is the height?

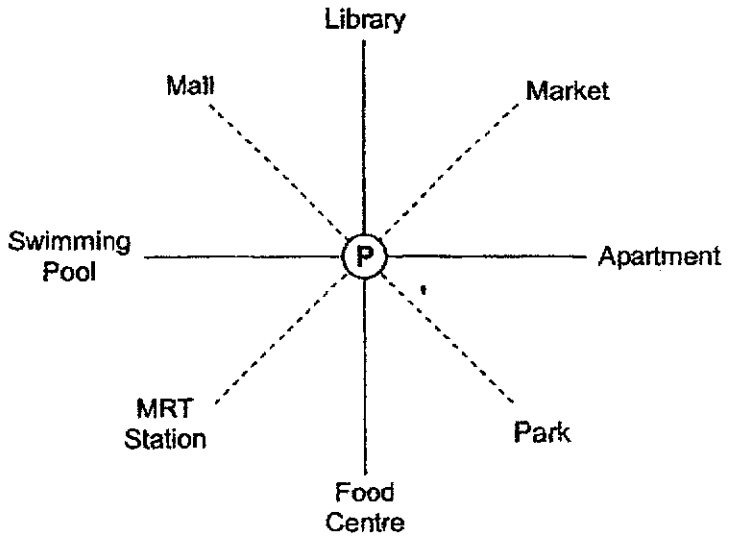

(1) KP

(2) LN

(3) KL

(4) MR

5 Pravin is standing at the point marked **P** in the figure below. He is facing the market. What will he face when he turns 135° clockwise?

(1) Library

(2) Apartment

(3) Food Centre

(4) Swimming Pool

(Go on to the next page)

Downloaded from SingaKids.com

6 Vikram bought 5 identical pens at a bookshop. He gave the cashier \$10 and received a change of \$$x$. Find the cost of each pen in terms of x.

(1) $\$(10 - 5x)$

(2) $\$(10 - \frac{x}{5})$

(3) $\$(\frac{10 - x}{5})$

(4) $\$(10x - 5)$

7 Arrange the following fractions from the smallest to the largest:

$$\frac{4}{3}, \quad 1\frac{1}{5}, \quad \frac{5}{4}$$

	smallest		largest
(1)	$\frac{4}{3}$,	$\frac{5}{4}$,	$1\frac{1}{5}$
(2)	$\frac{5}{4}$,	$\frac{4}{3}$,	$1\frac{1}{5}$
(3)	$1\frac{1}{5}$,	$\frac{5}{4}$,	$\frac{4}{3}$
(4)	$1\frac{1}{5}$,	$\frac{4}{3}$,	$\frac{5}{4}$

(Go on to the next page)

8 Which of the following is the same as 4090 g?

(1) 4 kg 9 g

(2) 4 kg 90 g

(3) 40 kg 9 g

(4) 40 kg 90 g

9 Lee was in school from 7.20 a.m. to 3 p.m. yesterday. How long was he in school yesterday?

(1) 4 h 20 min

(2) 7 h 40 min

(3) 8 h 20 min

(4) 8 h 40 min

(Go on to the next page)

Downloaded from SingaKids.com

Use the information below to answer Questions **10** *and* **11**.

Pei baked some tarts to sell at a fundraising event. Figure 1 shows the number of tarts that sold. Figure 2 shows the number of tarts left unsold at the end of the fundraising event.

Figure 1

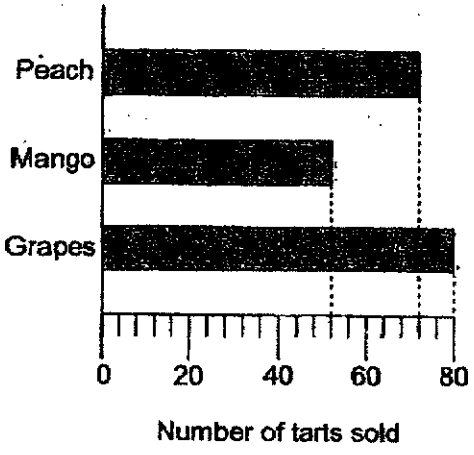

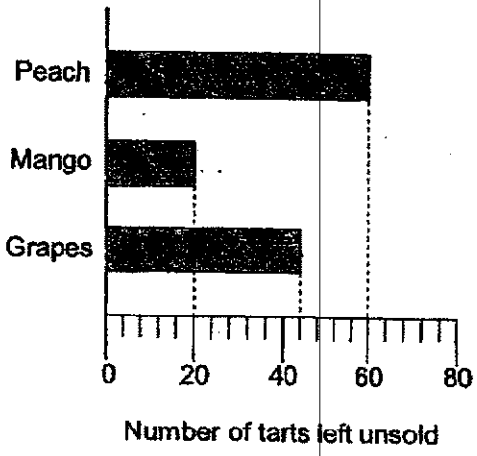

Figure 2

10 How many peach tarts did Pei bake for the fundraising event?

(1) 123

(2) 132

(3) 136

(4) 138

11 Altogether, how many mango and grape tarts were left unsold at the end of the fundraising event?

(1) 64

(2) 124

(3) 132

(4) 160

(Go on to the next page)

Downloaded from SingaKids.com

12 Anna, Bala and Charlie shared an amount of money in the ratio 7 : 2 : 4. The average amount of money that each child received was $39. How much more money did Anna receive than Charlie?

(1) $9

(2) $27

(3) $3

(4) $45

13 Mr Tan travelled 2.8 km in a taxi from home to his office. His taxi fare was based on the charges shown below.

First km	$3.60
Every additional 400 m or less	$0.22

How much was his taxi fare?

(1) $4.04

(2) $4.48

(3) $4.70

(4) $5.14

(Go on to the next page)

Downloaded from SingaKids.com

14 After giving 3 boxes of pencils to Molly, Aaron had 45 pencils left. Aaron then bought another 74 pencils. In the end, Molly and Aaron had 242 pencils altogether. How many pencils were there in each box that Aaron gave to Molly?

(1) 41

(2) 56

(3) 71

(4) 123

15 There are 21 lamp posts along a straight path. The distance between the 3rd and the 10th lamp post is 11.2 m. What is the distance between the first and the last lamp post?

(1) 22.4 m

(2) 29.4 m

(3) 32 m

(4) 33.6 m

PAPER 1
(BOOKLET B)

Name: _____ ( )

Class: Primary 6_____

/ 25

Total Time for Booklets A and B: 1 hour

Do not turn over this page until you are told to do so.

Follow all instructions carefully.

Answer all questions.

Write your answers in this booklet.

You are **not** allowed to use a calculator.

Downloaded from SingaKids.com

Questions **16** to **20** carry **1** mark each. Write your answers in the spaces provided. For questions which require units, give your answers in the units stated.

(5 marks)

Do not write in this space

16 Find the value of $84 \div 7 - 4 \times 2$

Ans: _____

17 Find the value of $8 \div \frac{2}{5}$

Ans: _____

18 Write down the smallest common multiple of 6 and 8.

Ans: _____

19 Express $2\frac{9}{12}$ as a decimal.

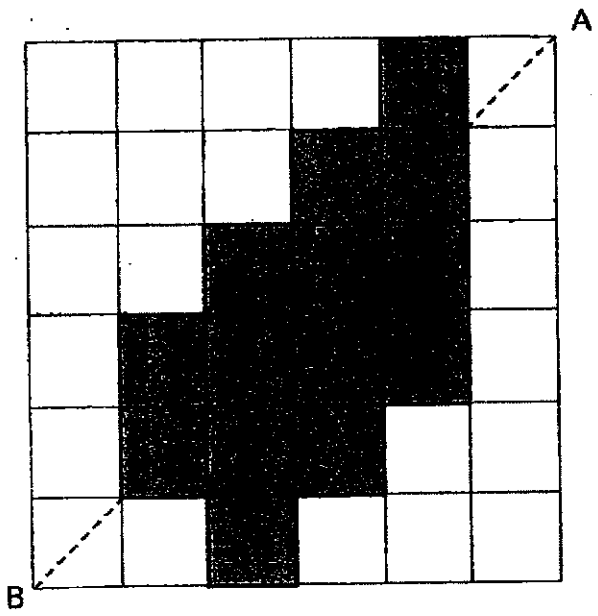

Ans: _____

(Go on to the next page)

Downloaded from SingaKids.com

20 In the figure, shade 4 more squares to form a symmetric figure with AB as the line of symmetry.

Do not write in this space

Questions 21 to 30 carry 2 marks each. Show your working clearly and write your answers in the spaces provided. For questions which require units, give your answers in the units stated.

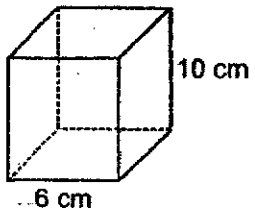

(20 marks)

Do not write in this space

21 Find the value of 9 ÷ 7. Give your answer correct to 2 decimal places.

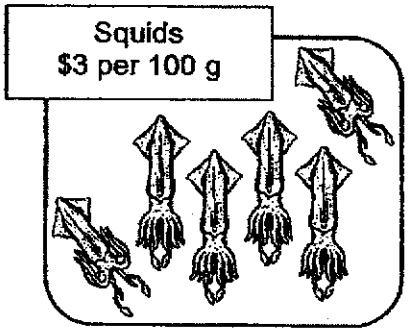

Ans: _____

22 The rectangular box below has a square base. Find its volume.

Ans: _____ cm^3

23 Ms Tan bought 1.2 kg of squids. How much did she pay?

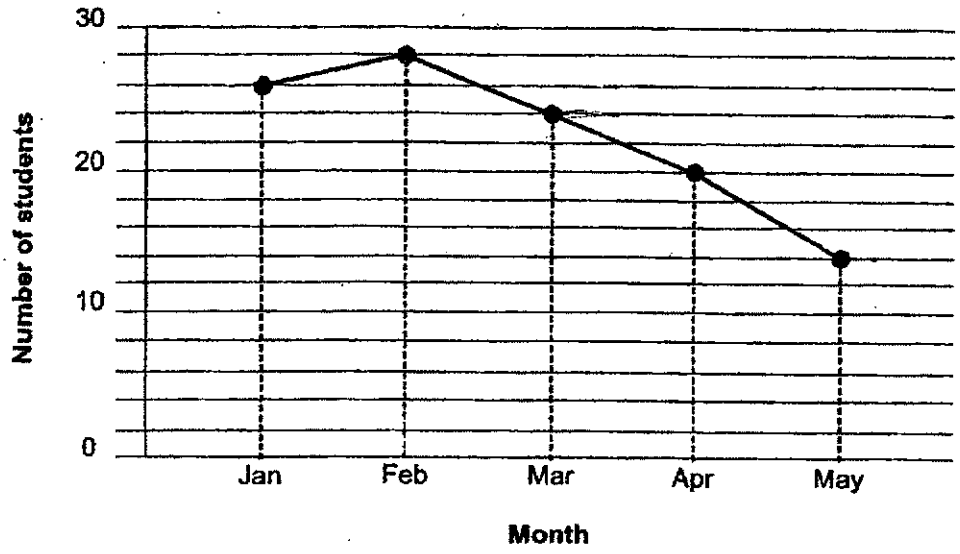

Ans: $ _____

(Go on to the next page)

Downloaded from SingaKids.com

24 The line graph shows the number of students who were late for school from January to May.

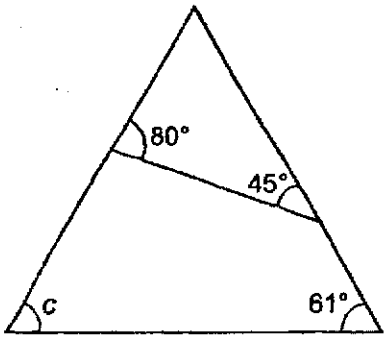

Do not write in this space

$\frac{5}{7}$ of all the students who were late were girls. How many boys were late?

Ans: _____

25 Find $\angle c$ in the figure below.

Ans: _____ °

(Go on to the next page)

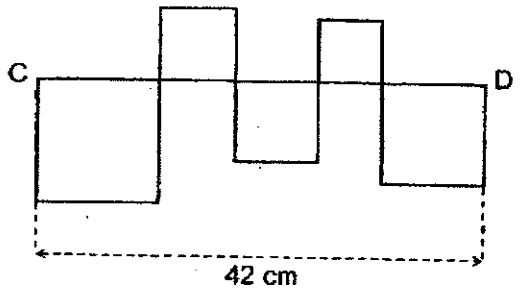

Downloaded from SingaKids.com

26 Ian spent $\frac{1}{7}$ of his money on a pair of shoes and $\frac{1}{4}$ of the remaining amount of money on some comic books. He had $450 left. Find the cost of the pair of shoes.

Do not write in this space

Ans: $ _____

27 Jacob had 3 m of wire. He cut some of the wire and bent it to form 5 squares of different sizes as shown in the figure below. CD is a straight line measuring 42 cm. Find the remaining length of wire in metres.

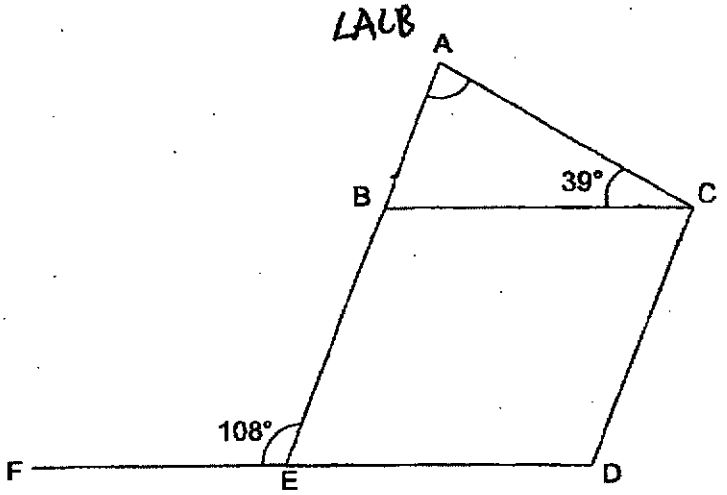

Ans: _____ m

(Go on to the next page)

Downloaded from SingaKids.com

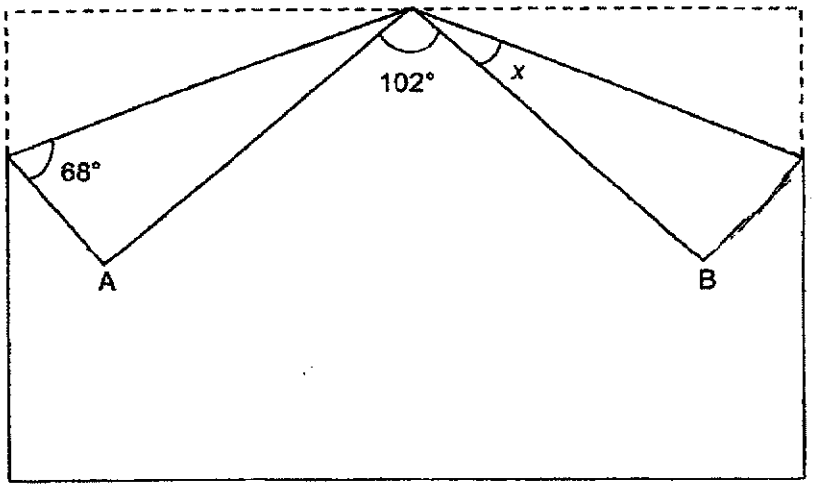

28 In figure below, BCDE is a parallelogram, ABE and FED are straight lines, ∠BEF = 108° and ∠ABC = 39°. Find ∠CAB.

Do not write in this space

Ans: _____ °

29 A rectangular piece of paper is folded at corners A and B as shown below. Find ∠x.

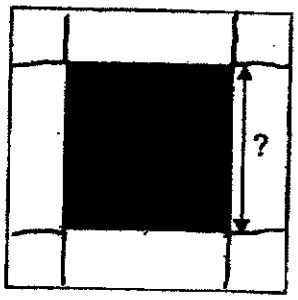

Ans: _____ °

(Go on to the next page)

Downloaded from SingaKids.com

30 The figure shows a black square tile glued onto a bigger white square tile. The area of the white square tile **not** covered by the black square tile is 65 cm^2. Given that the length of each square tile is a whole number, what could the smallest possible length of the black square tile be?

Do not write in this space

Ans: _____ _____ cm

PAPER 2

Name: _____( )

Class: Primary 6_____

/ 55

Time for Paper 2: 1 h 30 min

Do not turn over this page until you are told to do so.

Follow all instructions carefully.

Answer all questions.

Show your working clearly as marks are awarded for correct working.

Write your answers in this booklet.

You are allowed to use a calculator.

Downloaded from SingaKids.com

Questions 1 to 5 carry 2 marks each. Show your working clearly and write your answers in the spaces provided. For questions which require units, give your answers in the units stated.

(10 marks)

Do not write in this space

1 Ms Lim packed $\frac{9}{11}$ kg of flour into packets. The mass of flour in each packet was $\frac{1}{5}$ kg, except for the last packet.

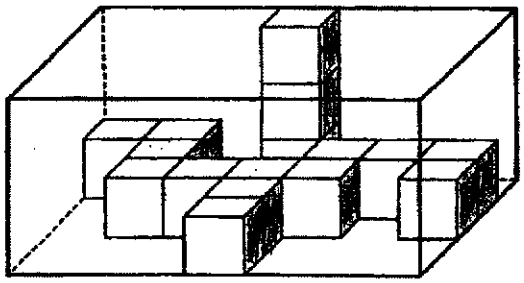

(a) How many packets contained $\frac{1}{5}$ kg of flour each?

(b) What was the mass of flour in the last packet?

Ans: (a) _____

(b) _____ kg

2 The figure shows a rectangular box partly filled with 1-cm cubes. What is the capacity of the rectangular box?

Ans: _____ cm^3

(Go on to the next page)

Downloaded from SingaKids.com

3 Adam and Jerry had some stickers in the ratio 3 : 11 at first. After Jerry gave Adam 16 stickers, they both had the same number of stickers. How many stickers did Adam have in the end?

Do not write in this space

Ans: _____

4 Peter must score an average of 85 points for 3 games in order to win a prize at a funfair. Peter scored 68 points and 79 points for the first 2 games. What is the least number of points he needs to score in the 3rd game to win a prize?

Ans: _____

(Go on to the next page)

Downloaded from SingaKids.com

5 Figure 1 is a parallelogram. Figure 2 is made up of 7 such parallelograms. The perimeter of Figure 2 is 180 cm. What is the length of the side AB of the parallelogram?

Do not write in this space

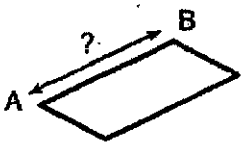

Figure 1

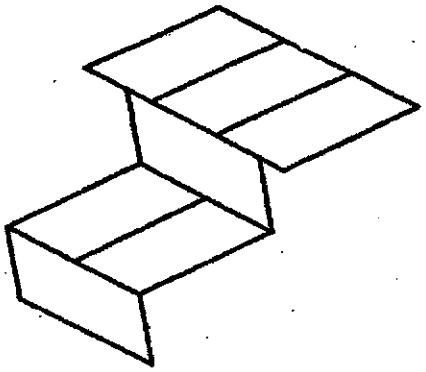

Figure 2

Ans: _____ cm

(Go on to the next page)

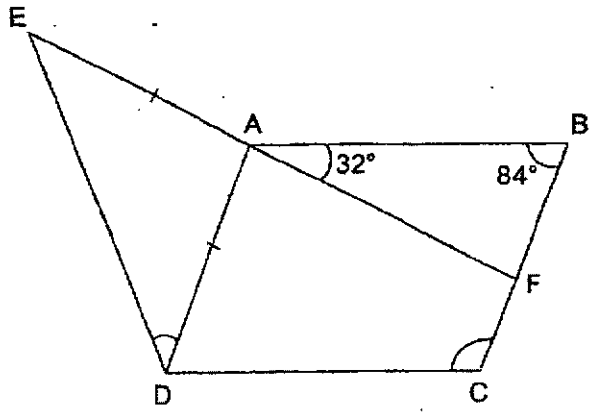

Downloaded from SingaKids.com

For questions **6** to **17**, show your working clearly and write your answers in the spaces provided. The number of marks available is shown in the brackets [ ] at the end of each question or part-question.

(45 marks)

Do not write in this space

6 In the figure below, ABCD is a parallelogram, EAF is a straight line and ADE is an isosceles triangle. $\angle BAF = 32°$ and $\angle ABF = 84°$.

(a) Find $\angle FCD$.

(b) Find $\angle ADE$.

Ans: (a) _____ [1]

(b) _____ [2]

(Go on to the next page)

7 Adam had three boxes of different masses as shown in the table below.

Do not write in this space

Box A	$(m + 13)$ kg
Box B	$2m$ kg
Box C	$(3m - 4)$ kg

(a) Find the total mass of all three boxes in terms of m.

Given that the average mass of each box is 27 kg,

(b) find the value of m.

(c) find the mass of Box C.

Ans: (a) _____ [1]

(b) _____ [2]

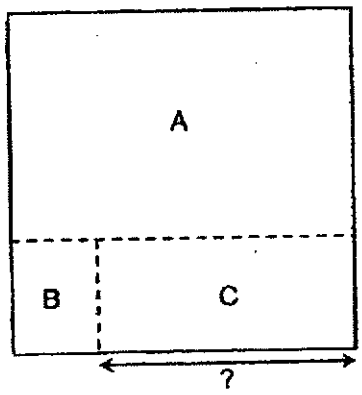

(c) _____ [1]

(Go on to the next page)

Downloaded from SingaKids.com

8 Lisa cut a square piece of paper along the dotted lines to get three rectangles: A, B and C. The areas of rectangles A, B and C are in the ratio 8 : 1 : 3. Given that the area of the square piece of paper was 324 cm^2, find the length of rectangle C.

Do not write in this space

Ans: _____ [4]

9 The fee for parking a car at a shopping mall is based on the charges shown at the table below.

First 1 hour	$3.50
Every additional 30 min or less	$2.00

(a) Xin Yi parked her car at the shopping mall from 9.20 a.m. to 11 a.m. How much was her parking fee?

(b) Willy paid $17.50 for his parking fee at the shopping mall. He left at 7.15 p.m. What would be the earliest time he arrived at the mall?

Ans: (a) _____ [1]

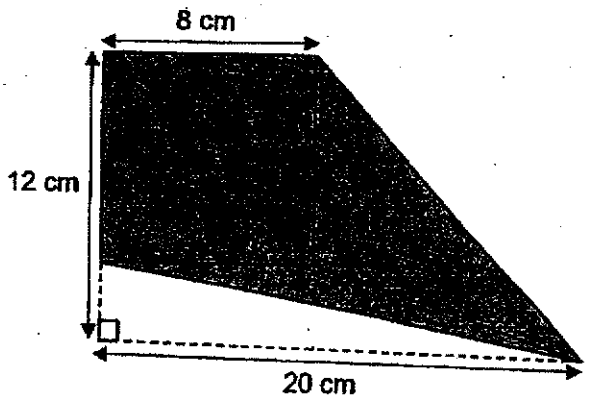

(b) _____ [2]

(Go on to the next page)

Downloaded from SingaKids.com

10 The figure below is made up of a square and two triangles. Find the area of the figure.

Do not write in this space

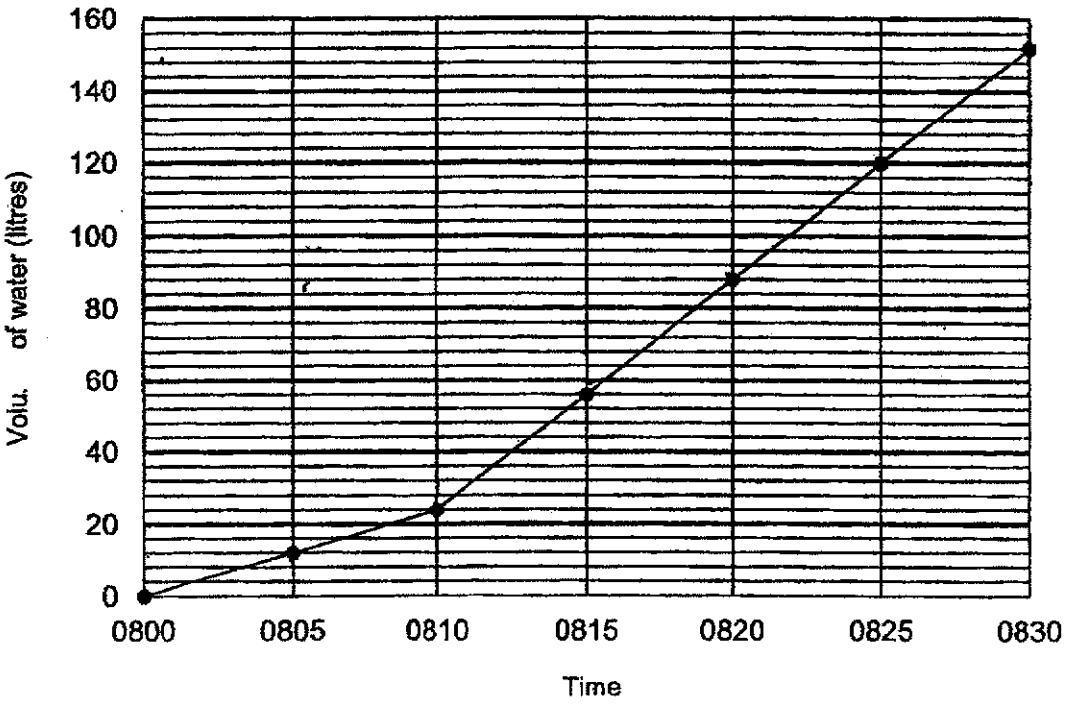

Ans: _____ [3]

11 James wanted to fill an empty rectangular tank with a capacity of 160 litres.
He turned on Tap A to add water into the tank at 0800.
At 0810, he also turned on Tap B to add more water into the tank.
The line graph shows the volume of water in the tank from 0800 to 0830.

Do not write in this space

(a) How many litres of water flowed into the tank in 1 min from Tap A?

(b) How many litres of water flowed into the tank in 1 min from Tap B?

Ans: (a) _____ [1]

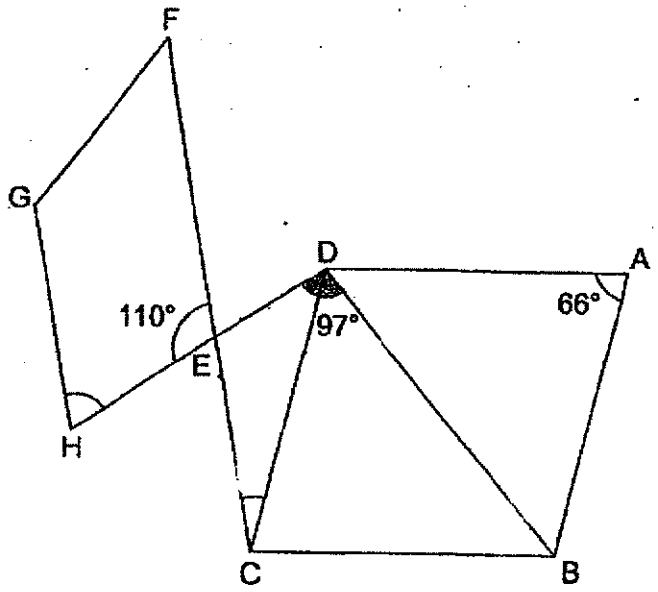

(b) _____ [2]

(Go on to the next page)

Downloaded from SingaKids.com

12 In the figure below, ABCD is a rhombus and EFGH is a trapezium. GH // FE, ∠EDB = 97°, ∠FEH = 110° and ∠BAD = 66°. HED and FEC are straight lines.

Do not write in this space

(a) Find ∠GHE.

(b) Find ∠FCD.

Ans: (a) _____ [1]

(b) _____ [3]

(Go on to the next page)

13 At a concert, 55% of the tickets were sold at full price and 40% of the tickets at half price. The remaining 20 tickets were given away for free to a charity. The total amount of money collected was $7200.

Do not write in this space

(a) How many tickets were sold at full price?

(b) What was the full price of each ticket?

Ans: (a) _____ [1]

(b) _____ [3]

14 After Mei spent $\frac{4}{5}$ of her money and Ben spent $\frac{3}{4}$ of his money, Mei had $65 more than Ben. How much more money did Mei have than Ben at first?

Ans: _____ [3]

(Go on to the next page)

Downloaded from SingaKids.com

15 Shane had some counters in three boxes: A, B and C.
$\frac{3}{8}$ of the number of counters in box A was equal to $\frac{2}{5}$ of the number of counters in box B. There were four times as many counters in box A as box C.

Do not write in this space

(a) What was the ratio of the number of counters in box A to the number of counters in box B to the number of counters in box C?

(b) After Shane used half of the counters in box A and half of the counters in box B, he had a total of 195 counters left in the three boxes. How many more counters were there in box B than box C in the end?

Ans: (a) _____ [1]

(b) _____ [3]

(Go on to the next page)

16 On Monday, Jimmy paid $42.90 for 9 jars and some marbles at a shop. On Tuesday, he went to the same shop and paid $64.70 for 11 jars and some marbles. Each jar cost $1. He bought 66 more marbles on Tuesday than Monday. Jimmy packed all the marbles he bought into the 20 jars. Some jars contained 12 marbles while the rest contained 16.
Given that the cost of each marble was the same,

(a) how many marbles did Jimmy buy altogether?

(b) how many jars contained 16 marbles?

Do not write in this space

Ans: (a) _____ [3]

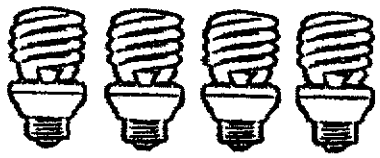

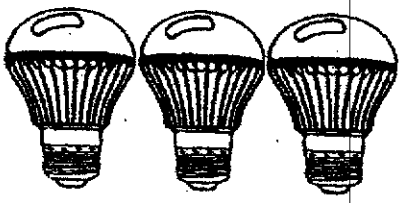

(b) _____ [2]

(Go on to the next page)

Downloaded from SingaKids.com

17 Mr Lim and Mr Wong bought some light bulbs at prices shown below.

Do not write in this space

Small Bulbs	Large Bulbs
	
4 for $10	3 for $16

(a) Mr Lim bought an equal number of small and large bulbs. He spent $102 more on the large bulbs than the small bulbs. How many bulbs did he buy altogether?

(b) Mr Wong spent an equal amount of money on the small and large bulbs. What is the least number of large bulbs that he could have bought?

Ans: (a) _____ [3]

(b) _____ [2]

Setter: Ms Rajesheela
