PRELIMINARY EXAMINATION 2022

Subject : **Mathematics**
Paper : **4048/01**
Level : **Secondary Four Express**
Date : **17 August 2022**
Duration : **2 hours**

READ THESE INSTRUCTIONS FIRST

Write your name, class and index number on all the work you hand in.
Write in dark blue or black pen.
You may use a HB pencil for any diagrams or graphs.
Do not use staples, paper clips, glue, correction fluid or correction tape.

Answer **all** questions.
If working is needed for any question it must be shown with the answer.
Omission of essential working will result in loss of marks.
The use of an approved scientific calculator is expected, where appropriate.
If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.
For π, use either your calculator value or 3.142, unless the question requires the answer in terms of π.

The number of marks is given in brackets [ ] at the end of each question or part question.
The total of the marks for this paper is 80.

For Examiner's Use

This paper consists of 23 printed pages.

The diagram above shows a kite $ABCD$ where angle $BAC = 30°$.
EB, BD and DF are three sides of a regular polygon.
ABE and ADF are straight lines.
The ratio of angle CBE to angle CBD is 3: 2.

(a) Calculate the number of sides of the polygon.

Answer ..... [2]

(b) Find angle BCD.

Answer ..... [2]

More papers at www.testpapersfree.com Downloaded from SingaKids.com

12 **(a)** The first four terms in a sequence of numbers are given below.

$T_1 = 2^2 + 7$

$T_2 = 3^2 + 12$

$T_3 = 4^2 + 17$

$T_4 = 5^2 + 22$

Explain why the value of T_n must be odd for all values of n.

Answer

.....

.....

.....

.....

.....

.....[2]

(b) The product of the first n terms of a sequence is given by $2n^2 + 3n$.
Find the 12^{th} term of this sequence.

15 A tour agency records the total number of people buying tour packages to Thailand and Vietnam in the months of November and December.
In November, 144 people bought the Thailand tour package and 100 people bought the Vietnam tour package.
In December, 208 people bought the Thailand tour package and 180 people bought the Vietnam tour package.

This information can be represented by the matrix, $\mathbf{M} = \begin{matrix} \\ \text{November} \\ \text{December} \end{matrix} \begin{matrix} \begin{matrix} \text{Thailand} & \text{Vietnam} \end{matrix} \\ \begin{pmatrix} 144 & 100 \\ 208 & 180 \end{pmatrix} \end{matrix}$

(a) The price of the Thailand and Vietnam package is \$890 and \$750 respectively.
Represent the price of the tour package by a 2×1 column matrix **K**.

Answer $\mathbf{K} = \begin{pmatrix} \\ \end{pmatrix}$ [1]

(b) Evaluate the matrix $\mathbf{R} = \mathbf{MK}$.

Answer $\mathbf{R} =$ [1]

11 Mr Ho would like to replace all 60 units of air conditioners in his office building. He is considering between two brands of air conditioners.

Information about the two brands of air conditioners is shown in the table below.

Brand	Samsing	Potasonic
Price of each air conditioner unit (after GST)	S$1388	S$740
Power consumption per air conditioner unit	3 kW	3.5 kW
Servicing Frequency	Twice a year	Four times a year
Total cost for servicing 60 units	$2100 per servicing	
Warranty*	Two years	Three years
*Warranties cover servicing and maintenance of air conditioner units with free replacement of parts for the stated duration.		

Electricity Tariff from 1 July 2022 is shown in the table below.

SPgroup Empowering the Future of Energy	**Tariff (without GST)**	**Tariff with GST**
kWh* charge (¢ per kWh)	30.17	32.28
* kWh (kilowatt-hour) is a unit of energy equal to one kilowatt (kW) of power sustained for one hour		

The usage of air conditioner units in Mr Ho's office building is shown in the table below.

Days	Usage Time/unit	Number of units used
Monday	8 hours	50
Tuesday to Friday	6 hours each day	60
Saturday and Sunday	No usage
