Section F: Comprehension

Read the passage carefully and answer questions 26-33.

Birds are warm-blooded animals. There are many different types of birds. **They** have feathers, beaks, tails, claws and wings. Not all birds can fly.

Some birds, like ostriches and penguins, cannot fly. The ostrich is the largest living bird. **It** can be as tall as 2 metres and it can run very fast. The penguin, which lives in very cold places, prefers to swim.

Most birds eat insects, seeds and fruits. Some birds like eagles, hawks and vultures prefer to eat meat.

All birds lay eggs. They sit on their eggs to keep them warm until the eggs hatch. When the baby bird hatches, its mother feeds it until it is strong enough to leave the nest.
