Section H : Comprehension (8 marks)

Read the passage carefully and answer the questions that follow.

John had two adorable rabbits, Milky and Oreo, which he played with daily. One morning, John noticed that the rabbits' trays of hay, vegetables and water in their cage were toppled. When he opened the cage door, Oreo was full of life as usual, but Milky barely moved. John was concerned. He coaxed Milky out, but she remained almost motionless. Suddenly, she vomited. Alarmed, John called his mother, who immediately decided to take Milky to the vet.

At the clinic, Dr. Khoo examined Milky carefully. She listened to her heartbeat after weighing her. As she pressed gently on Milky's stomach, her frown deepened. John's fear turned to panic. Was something seriously wrong with his beloved rabbit?

After what felt like forever, Dr. Khoo explained, "Milky's digestive system is blocked. This is common in rabbits, but we need to act fast." She then prescribed medication to help clear the blockage. She also needed to keep Milky overnight for observation. John was devasted to be away from Milky.

The next day when John came to pick Milky up, he saw that she looked better. John knew that feeding Milky her medication would enable her to get back to health, and he did so, diligently. As a result, Milky's energy returned, and soon, she was happily playing with Oreo once again.
