BOOKLET A

NAME : _____ ( )

CLASS: PR 4 ( )

28 Questions

56 Marks

Parent's / Guardian's Signature

This booklet consists of 29 printed pages

Instructions to candidates

- Follow all instructions carefully.
- Answer all questions.
- Shade the answers in the Optical Answer Sheet (OAS) provided.
- You are allowed **1h 45 min** to answer all the questions in both **Booklets A and B**.

BOOKLET	MARKS	
	POSSIBLE	ACTUAL
A	56	
B	44

Section A [56 marks]

For each question from 1 to 28, four options are given. One of them is the correct answer. Make your choice (1, 2, 3 or 4) and shade your answer in the Optical Answer Sheet (OAS).

1 Peter found a plant in the garden and measured its height.

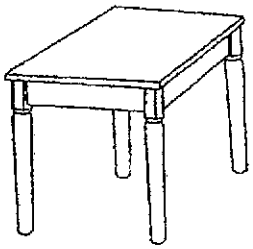

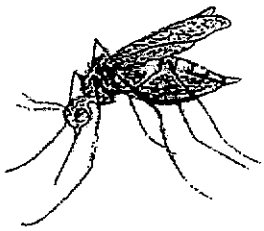

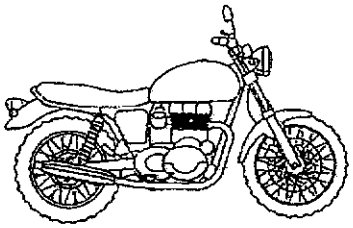

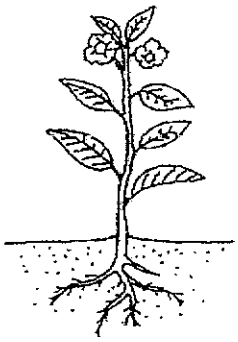

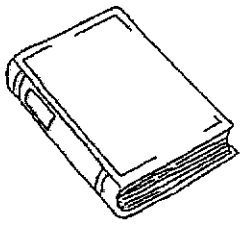

At the start At two weeks

From his observation, Peter concluded that the plant is a living thing because it can _____.

(1) breathe
(2) grow
(3) respond
(4) reproduce

Downloaded from SingaKids.com

2 Which pair of living things is not classified correctly?

	Living thing	Non-living thing
(1)		
(2)		
(3)		
(4)		

Downloaded from SingaKids.com

3 Sam made the following observations on the life cycle of an animal.

- There are four stages in the life cycle.
- The young does not look like the adult.

Which animal was Sam observing?

(1) frog

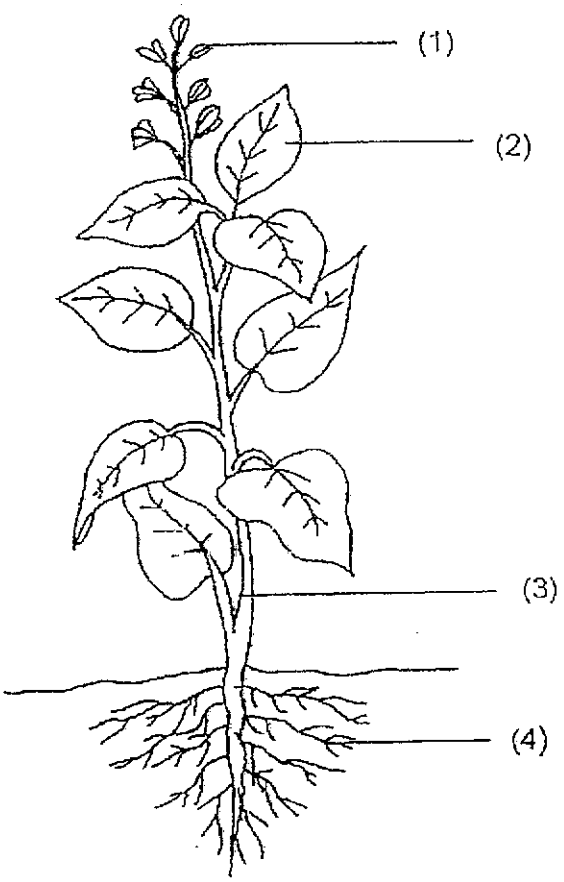

(2) cockroach

(3) grasshopper

(4) mosquito

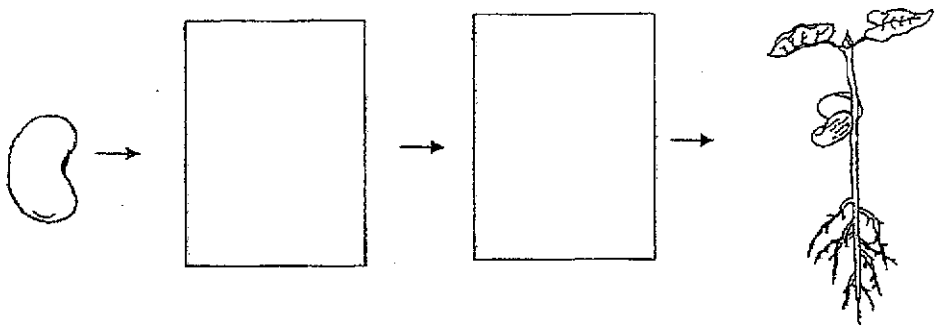

Downloaded from SingaKids.com

4 Study the diagram carefully. Which part (1), (2), (3) or (4), supports the plant?

Downloaded from SingaKids.com

5 The diagram below shows the growth of a young plant with two missing stages P and Q.

P Q

Which one of the following shows the correct stages for P and Q?

	P	Q
(1)		
(2)		
(3)		
(4)		

Downloaded from SingaKids.com

6 Which one of the following shows the correct order when food moves through some parts of the human digestive system?

(1) 

(2) 

(3) 

(4) 

Downloaded from SingaKids.com

7 The diagram shows a magnet brought near a wooden block.

What will happen to the wooden block?

(1) It will not move.

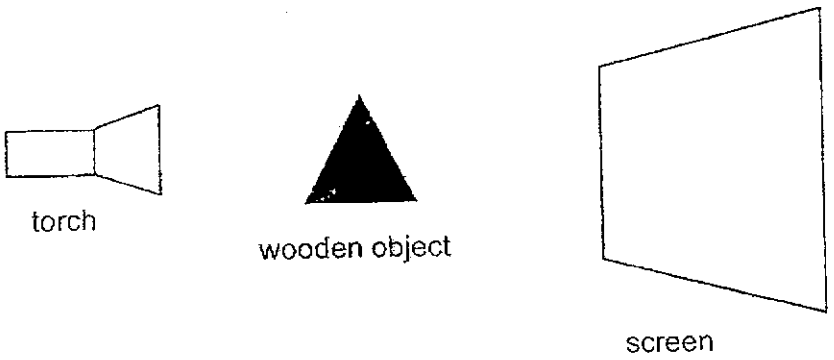

(2) It will move upwards.

(3) It will move towards the magnet.

(4) It will move away from the magnet.

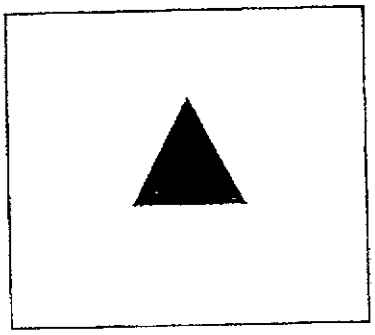

Downloaded from SingaKids.com

8 The set-up below shows light shining on a wooden object.

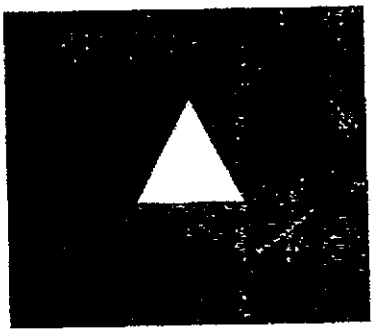

Which one of the following would likely be seen on the screen?

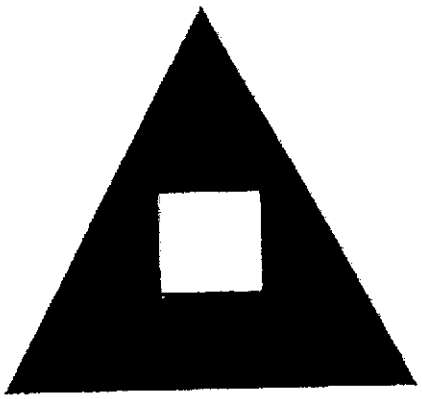

(1)

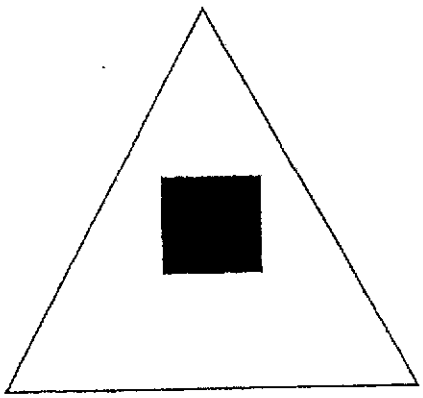

(2)

(3)

(4)

Downloaded from SingaKids.com

9 Which one of the following is **not** a source of heat?

(1) The Sun

(2) A woollen cap

(3) A lighted bulb

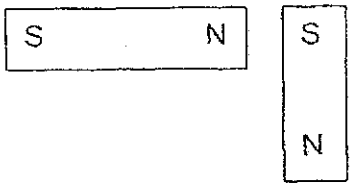

(4) A candle flame

10 In which one of the following will the two magnets push each other away?

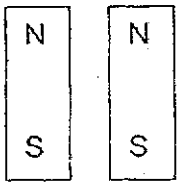

(1)

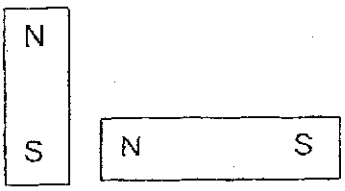

(2)

(3)

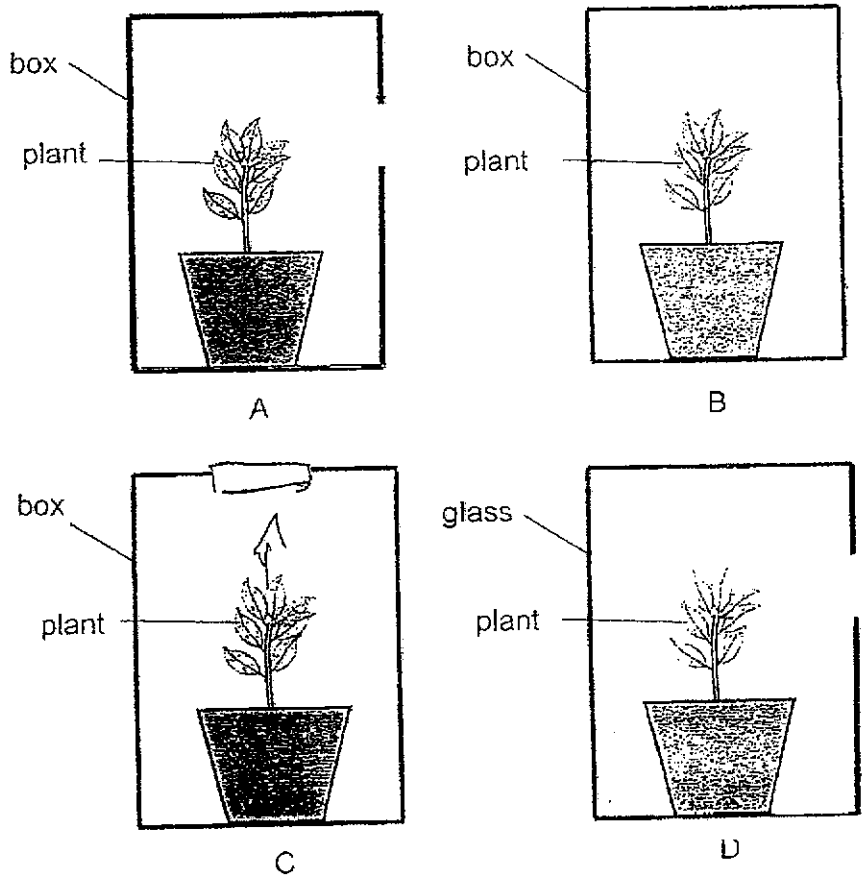

(4)

Downloaded from SingaKids.com

11 Xun Yuan wanted to conduct an experiment to find out if living things respond to changes.

Which two set-ups, A, B, C or D, should he choose to carry out a fair test?

(1) A and B only

(2) B and C only

(3) A and C only

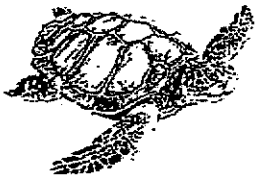

(4) B and D only

Downloaded from SingaKids.com

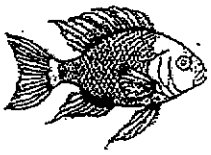

12 Study the classification chart and the three animals, A, B and C.

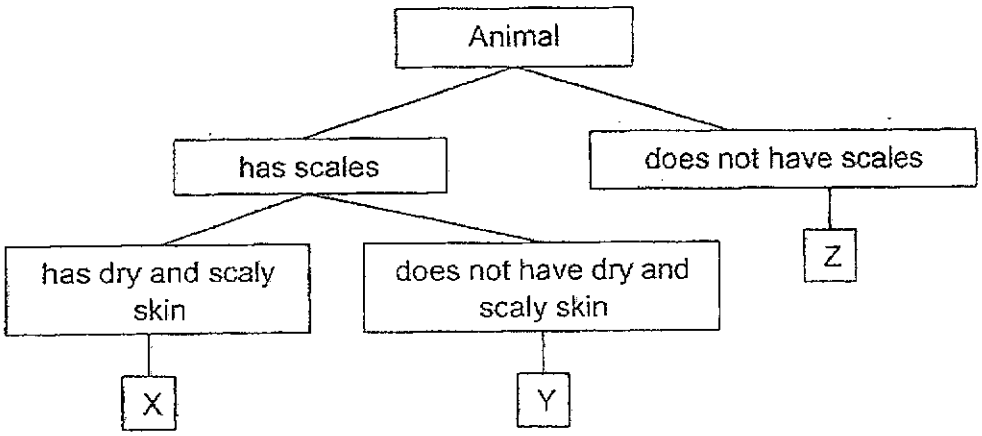

A

B

C

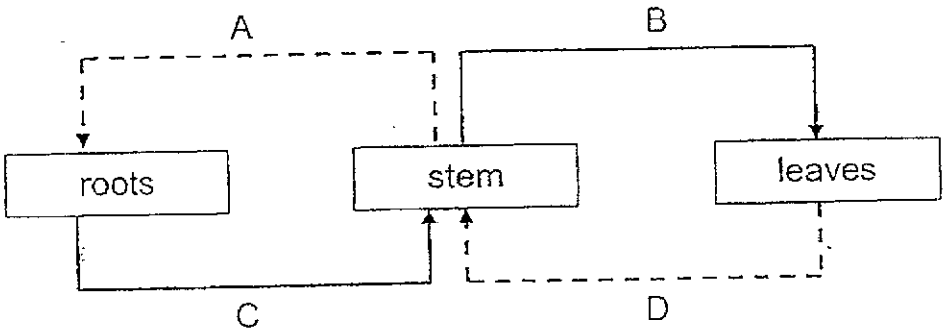

Which of the following animals A, B and C are best represented by X, Y and Z?

	X	Y	Z
(1)	B	C	A
(2)	A	B	C
(3)	B	A	C
(4)	C	B	A

Downloaded from SingaKids.com

13 The diagram below shows three parts of a plant.

Which of the following pairs of arrows show the correct direction of movement of water?

(1) A and B

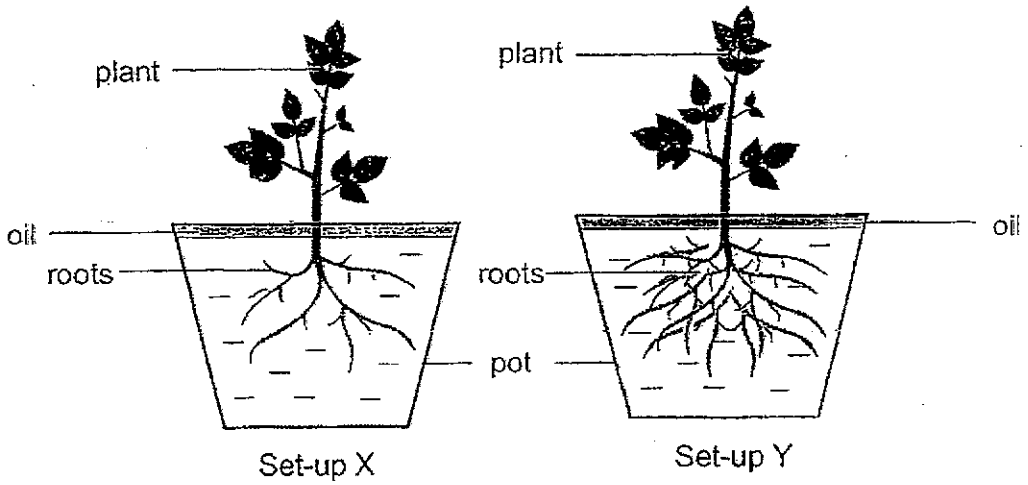

(2) B and C

(3) A and D

(4) C and D

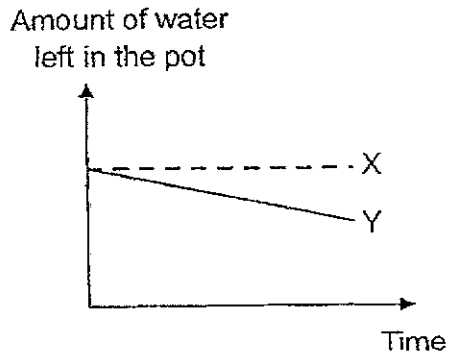

Downloaded from SingaKids.com

14 Thomas prepared two set-ups, X and Y, as shown in the diagram. He used the same amount of water and placed them in the sun for one day.

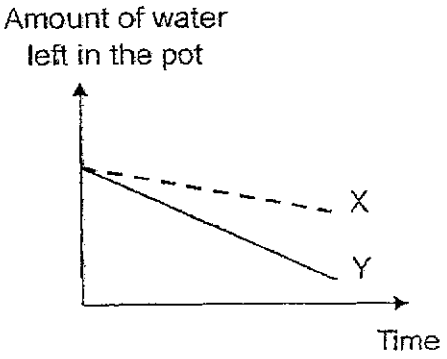

Which of the following correctly shows the amount of water left in the pot after one day?

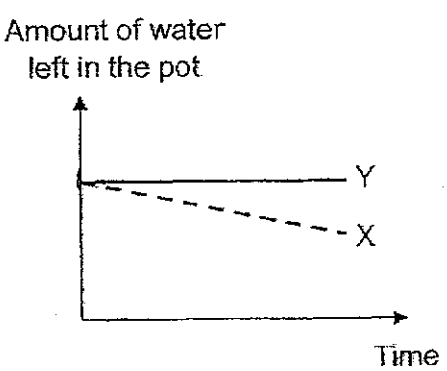

(1)

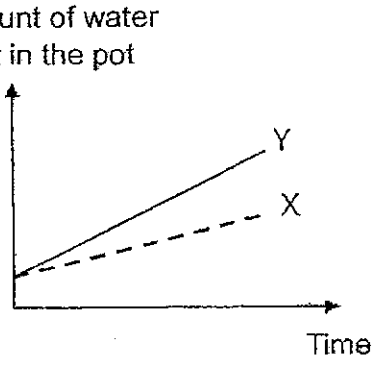

(2)

(3)

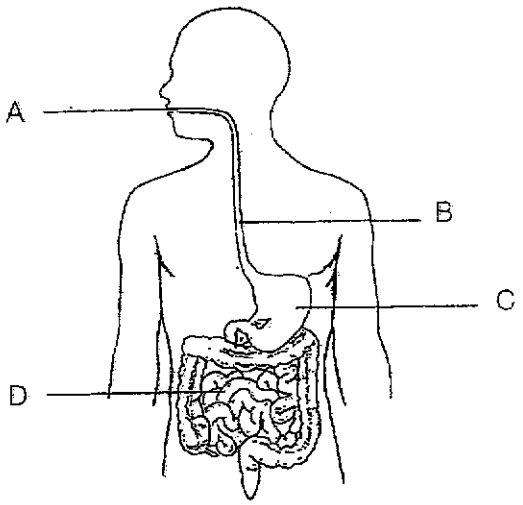

(4)

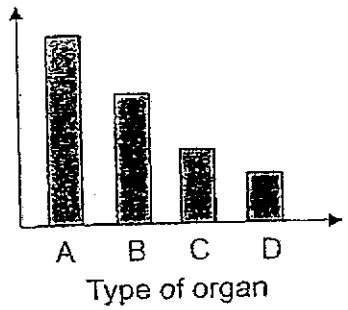

Downloaded from SingaKids.com

15 The diagram below shows the human digestive system.

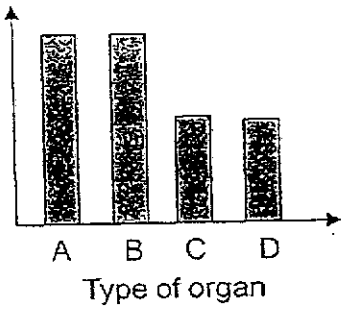

Which one of the following graphs shows the amount of undigested food leaving organ A, B, C and D after he consumed a burger?

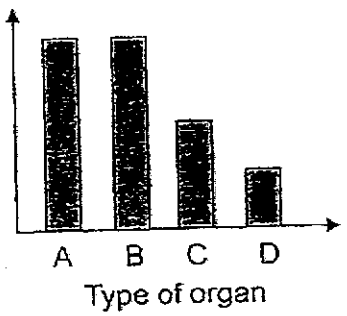

(1)

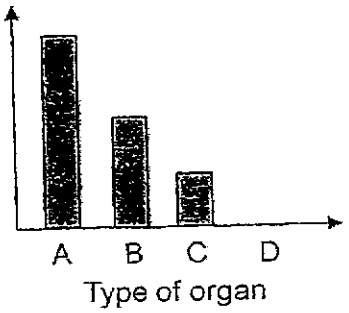

(2)

(3)

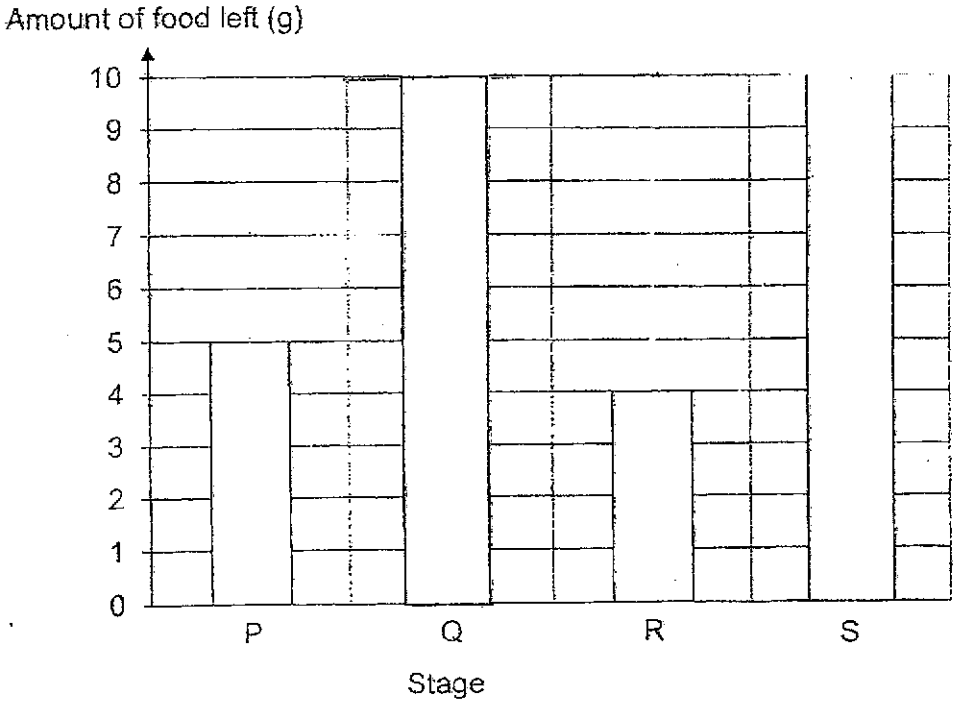

(4)

Downloaded from SingaKids.com

16 Tanay kept four insects of the same species but at different stages of its life cycle, P, Q, R and S in four containers. He placed 10 g of food in each container and recorded the amount of food left in each container after three days. The bar graph shows the results of his experiment.

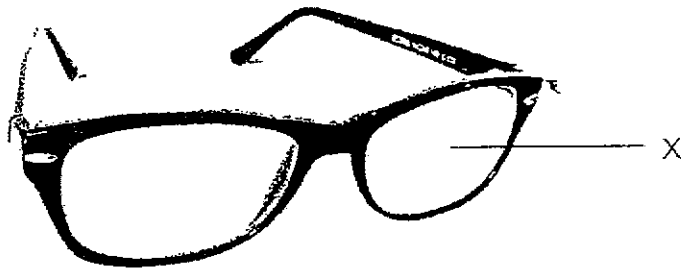

What stages of the life cycle of the insect are P, Q, R and S?

	Egg	Larva	Pupa	Adult
(1)	P	Q	R	S
(2)	S	Q	R	P
(3)	P	S	Q	R
(4)	Q	R	S	P

Downloaded from SingaKids.com

17 The diagram below shows a pair of spectacles.

Which one of the following shows the property for part X?

(1) flexibility

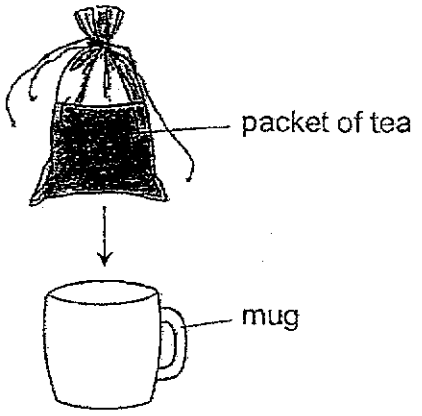

(2) waterproof

(3) transparency

(4) ability to float

Downloaded from SingaKids.com

18 Jenny placed a packet of tea into a mug. None of the tea overflowed the mug.

Which of the following is correct?

(1) The shape and the volume of the tea changed.

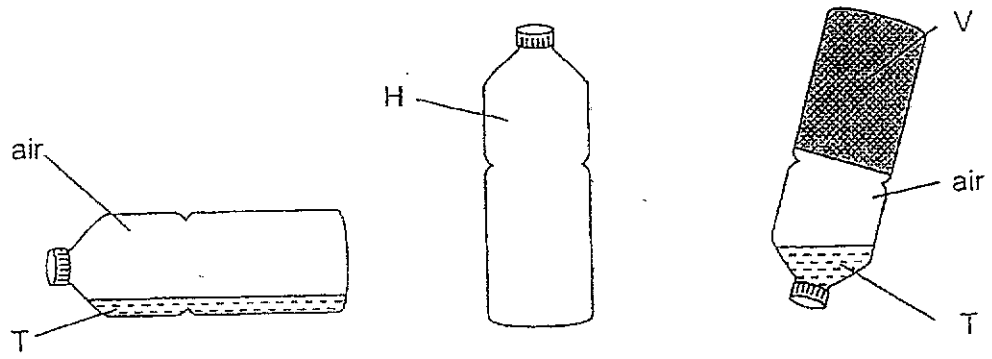

(2) The shape and the volume of the tea remained the same.

(3) The volume of the tea changed but the shape remained the same.

(4) The shape of the tea changed but the volume remained the same.

Downloaded from SingaKids.com

19 The diagram below shows three substances, T, H and V. They were placed in three identical bottles.

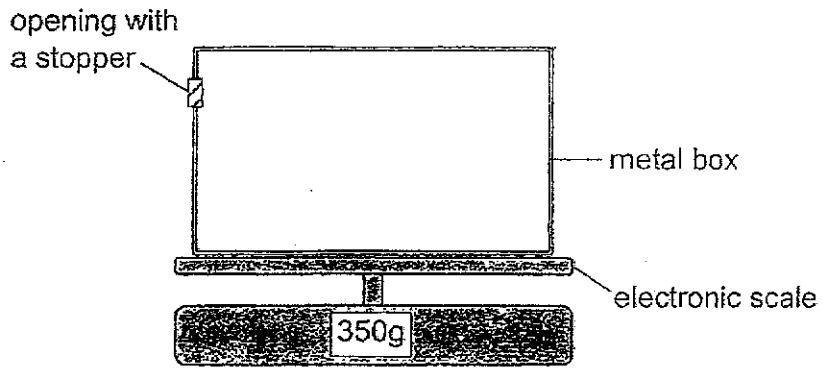

Based on the diagrams, which of the following is definitely correct?

(1) H has a definite shape and volume.
(2) T is a solid and takes the shape of its container.
(3) V has a definite volume and cannot be compressed.
(4) V has the largest volume among the three substances.

Downloaded from SingaKids.com

20 A metal box containing 500cm^3 of air was placed on an electronic scale as shown in the diagram below.

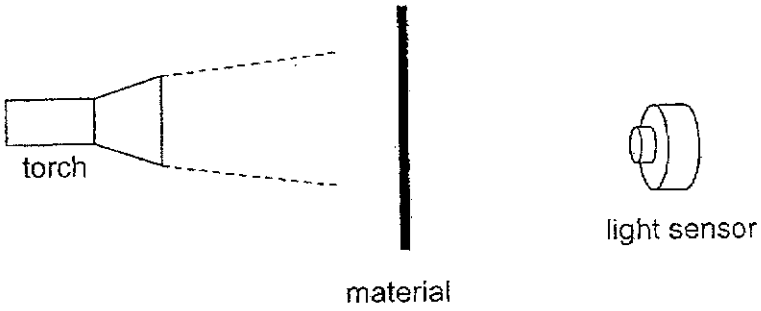

Another 150cm^3 of air was pumped into the tank through the opening.

Which of the following correctly shows the changes in the mass and volume of air in the tank?

	Volume of air (cm^3)	Mass of air (g)
(1)	increase	remain the same
(2)	increase	increase
(3)	remain the same	remain the same
(4)	remain the same	increase

Downloaded from SingaKids.com

21 The set-up below was placed in a dark room.

Eric placed materials J, K and L, one at a time, between the torch and the light sensor. The amount of light detected by the light sensor is shown below.

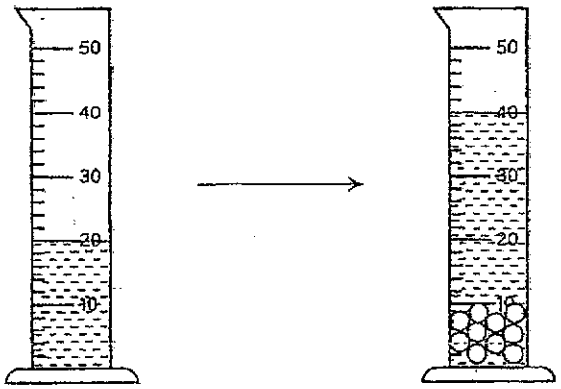

Material	Amount of light detected (units)
None	100
J	45
K	0
L	100

Which of the following is correct?

	Light is unable to pass through	Light is able to pass through
(1)	J and L	K
(2)	J and K	L
(3)	L	J and K
(4)	K	J and L

Downloaded from SingaKids.com

22 Tony prepared the set-up below to find the volume of some marbles. He poured some water into a measuring cylinder and placed 10 identical marbles into the measuring cylinder.

Based on Tony's experiment, which of the following is correct?

A Marbles occupy space.

B Water has no definite volume.

C The volume of each marble is $2cm^3$.

(1) A only

(2) B only

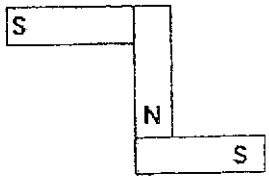

(3) A and C only

(4) A, B and C

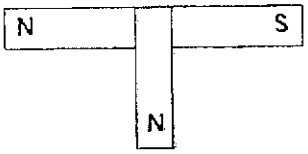

Downloaded from SingaKids.com

23 Study the diagrams below. Each set-up is made up of a few magnets.

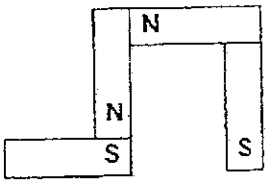

(A)

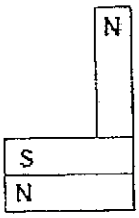

(B)

(C)

(D)

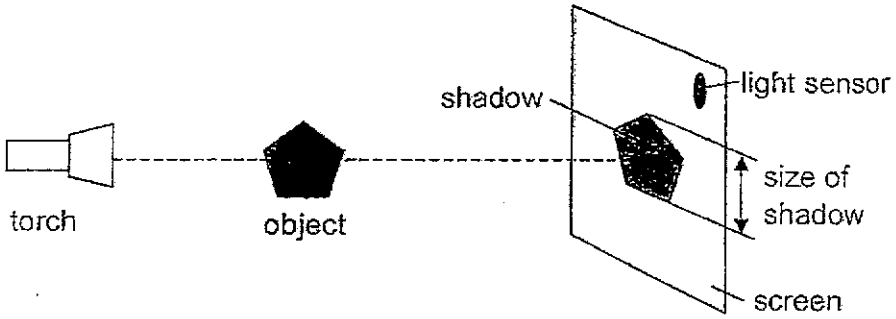

Which of the following diagrams show possible arrangements of bar magnets?

(1) A and B only
(2) A and D only
(3) B and C only
(4) C and D only

Downloaded from SingaKids.com

24 Ridwan set up the following experiment in a dark room. A light sensor was attached to the screen and recorded a reading of 100 units.

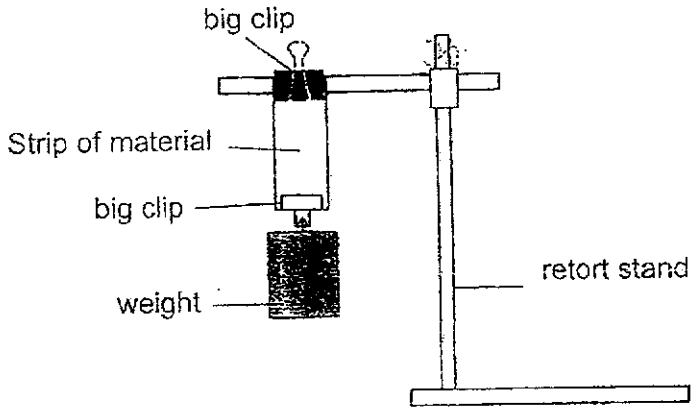

What should Ridwan do to get the smallest possible shadow, and what would the reading on the light sensor be?

	Action	Light Sensor Reading (units)
(1)	Move the torch closer to the object	150
(2)	Move the torch away from the object	50
(3)	Move the screen closer to the object	50
(4)	Move the screen away from the object	150

Downloaded from SingaKids.com

25 Mr. Tan conducted an experiment to test the strength of four different materials, P, Q, R and S. The strips are of the same thickness and length.

Mr. Tan increased the number of weights until each strip broke. His results are shown below.

	Number of weights taken for the strip of material to break		
Strip of Material	1st trial	2nd trial	3rd trial
P	10	8	9
Q	15	17	18
R	4	6	5
S	8	6	7

Arrange the materials from the strongest to the weakest.

(1) P, Q, R, S
(2) Q, R, S, P
(3) Q, P, S, R
(4) S, P, R, Q

Downloaded from SingaKids.com

26 The diagram below shows two flasks connected by a glass tube containing a drop of ink.

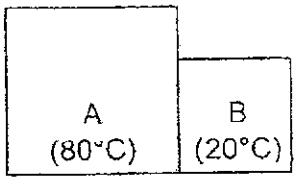

Which of the following shows the correct observation after 5 minutes?

	Movement of the drop of ink	Direction of heat transfer
(1)	towards flask P	from the surrounding air to the ink
(2)	towards flask P	from the flame to the air in flask Q
(3)	towards flask Q	from the surrounding air to the ink
(4)	towards flask Q	from the flame to the air in flask P

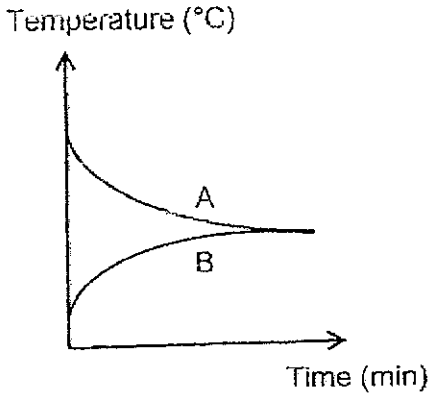

Downloaded from SingaKids.com

27 Kelly placed two metal blocks, A and B, next to each other. The diagram below shows the temperature of the two blocks at the start of the experiment.

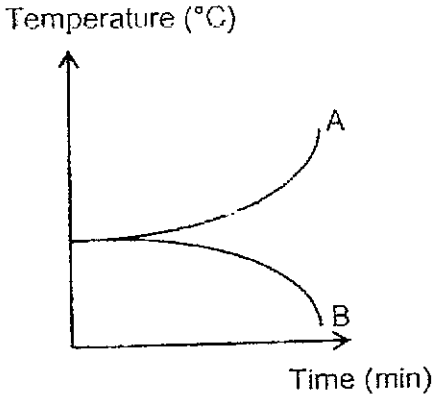

Which of the following graphs correctly shows the change in the temperature of blocks A and B after some time?

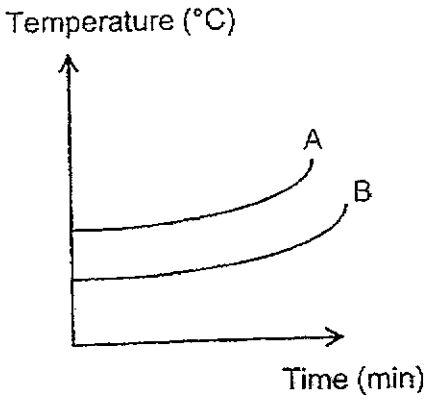

(1)

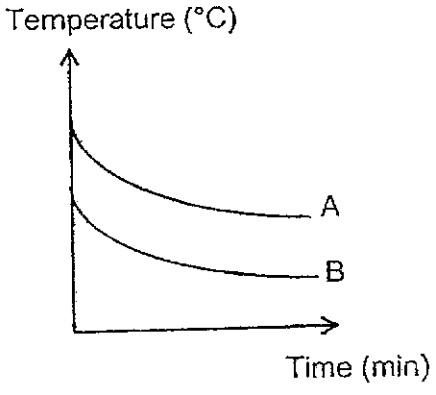

(2)

(3)

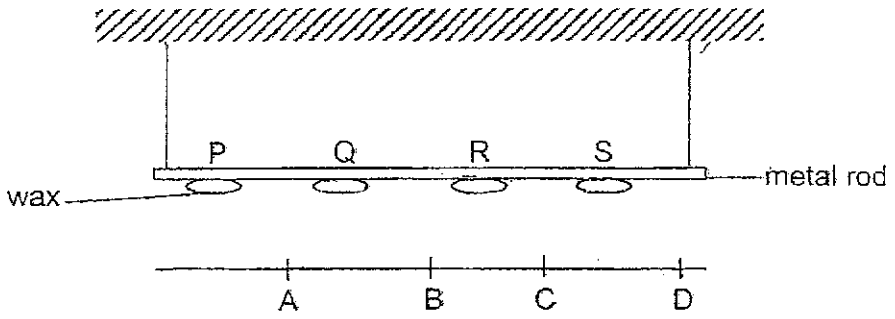

(4)

Downloaded from SingaKids.com

28 The diagram below shows a metal rod hung from the top. Four similar pieces of wax, P, Q, R and S, were attached on the metal rod.

A flame was placed under the metal rod and the wax pieces started melting. The time taken for each piece of wax to completely melt is shown in the table below.

Wax	Time taken to completely melt (s)
P	35
Q	13
R	10
S	26

Based on the above information, at which position, A, B, C or D, was the flame placed?

(1) A
(2) B
(3) C
(4) D

32 P and Q are stages in the life cycle of a butterfly.

P

Q

Choose the correct words from the box to answer the questions below.

eats	pupa	larva	reproduces

(a) Name stages P and Q. [2]

P: _____

Q: _____

(b) At stage Q, it _____ a lot. [1]

(Go on to the next page)

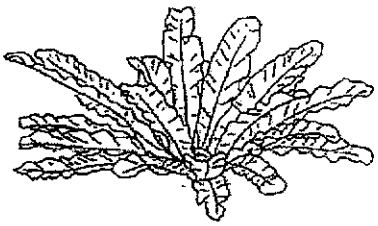

SCORE	/ 3

Downloaded from SingaKids.com

33 Study the following plants, X and Y, as shown below.

Plant X

Plant Y

(a) Based on the observable characteristics, state one difference between plant X and Y. [1]

_____

_____

(b) State how plants X and Y reproduce. [1]

_____

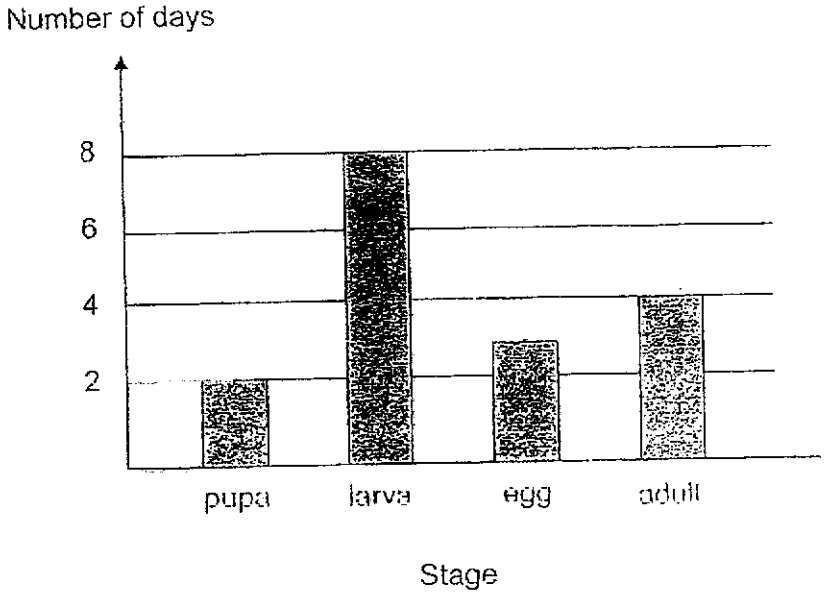

_____

(Go on to the next page)

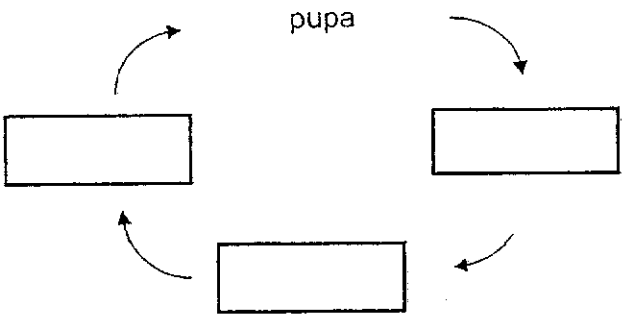

SCORE	/2

Downloaded from SingaKids.com

34 Tate observed the life cycle of mosquito. The number of days for each stage was recorded. The stages are not arranged in order and he drew a graph as shown below.

(a) Write the stages of the life cycle of a mosquito in the correct order. [2]

(b) Based on the information from the above graph, how many days does it take for the mosquito to become an adult after the egg was hatched? [1]

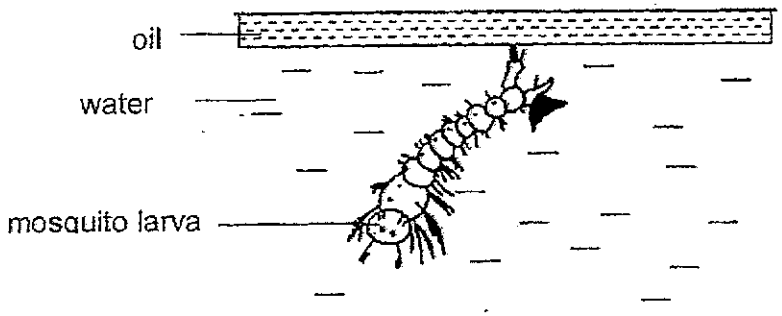

days

(Go on to the next page)

SCORE 3

Downloaded from SingaKids.com

(c) Tate sprayed some oil on the water where he found some mosquito larvae in a pail of water.

State another way that Tate can do to stop the mosquito from breeding.
